

# Bobbin Talk

06/22/2009

**cmarchuska**

Eco-friendly fashion has gained a lot of attention over the last year and some brands do it better than others. There are a lot of companies getting on the band-wagon just because it is the latest trend and then there are the designers who believe in building a better future. In my opinion sustainable clothing should not be an expensive trend, it should be a natural choice with a plethora of designs for a variety of occasion and affordable prices.

Here is one designer who offers some great fashion ideas through sustainable fabric blends and a better fit.

photo from Entrepreneur magazine Feb 2009

I've been reading a lot lately about all the people who have been laid off and took it as an opportunity to do what they love. Christine Marchuska is one of those innovative entrepreneurs who dived into the eco-fashion pool and started her own line. Her basic dresses sure look like a much better fit than most standard socially-conscious shapeless tees.

A summer tank dress made of 100% organic cotton.

Shirt-dress made out of 100% organic cotton.
